

NUMBERED DOCUMENT 03

Environmental Responsibility & Sustainability Statement

Implementation: 08 January 2018

Review: 07 January 2019

In the undertaking of our business operations, we are fully committed to responsible environmental management.

Reports such as *The Impacts of Construction and the Built Environment 2010*, *Willmott Dixon* suggest that the construction Industry accounts for approximately;

- 50% of global energy usage
- 50% of global water usage
- 50% of the total usage of raw materials

Reducing our environmental impact and maximising efficiency in the course of our business is a fundamental objective and we have committed to the following deliverables;

- Encourage environmental responsibility and sustainability through the reduction of waste.
- Monitor and record our environmental impact through annual audits.
- Ensure compliance with all relevant environmental legislation.
- Promote individual responsibility.
- Encourage reduced dependency on single occupancy car travel.
- Demonstrate the benefits of sustainable procurement planning.
- Reduce the consumption of water in our operations.
- Promote the importance of environmental responsibility and sustainability.

As a responsible contractor, we will provide an appropriate level of resource to ensure these commitments are delivered and we will measure our performance annually.
